

(modified from subject01_setup_cmc.xml)

- the <cmctool> name has been changed to visual3d_walk1.
- the <model_file> has been changed to visual3d_simbody_adjusted.osim.
- the <initial_time> and <final_time> for cmc have been set to 0.0 and 1.0 but this will be changed by the user when operating opensim to match the desired time range for cmc
- the <desired_kinematics_file> has been changed to:
resultsrra/visual3d_walk1_rra_kinematics_q.sto.
- the <external_loads_file> is now visual3d_simm_input.mot. this is the name of the file that is written by visual3d containing the fore platform information.
- the <external_loads_model_kinematics_file> is now visual3d_simm_input.mot. this is the name of the file that is written by visual3d containing the fore platform information.
